EDUCATION

Senior High School
Our Lady of Fatima University
With Honors
2020-2022

Diploma in Information Technology
Polytechnic University of the
Philippines
Consistent President's Lister
2022-2025

OBJECTIVE

Developer with a passion for creating efficient, user-focused software solutions. Proven ability to optimize systems and lead collaborative projects, eager to contribute technical expertise to innovative teams. I have skills in building applications, optimizing databases, as shown by increasing customer engagement through responsive websites for SSGC Group using WordPress, Elementor, HTML, CSS, and JavaScript. With a Diploma in Information Technology from Polytechnic University of the Philippines (Consistent President's Lister), I'm ready to apply my Java development skills, API knowledge (Insomnia, Codeception), and leadership experience to contribute to software solutions.

PROFESSIONAL EXPERIENCE

Software Developer Intern | Pixel8 Web Solutions and Consultancy Inc. July 2024 – September 2024

Developed web applications and backend utilities for a tech consultancy specializing in custom software solutions for small businesses. Supported a team of developers in delivering client projects on tight deadlines.

- Built scripts to automate data validation, reducing manual processing time by 30% for backend teams.
- Optimized REST APIs using PHP, cutting response times by 15% through optimization and Insomnia testing.
- Implemented automated testing with Codeception, resolving 20+ bugs pre-launch to ensure system reliability.
- Collaborated with a 3-member team to build the OBLAS Employee Management System, enabling secure CRUD operations for 200+ users.

Information Technology Intern | Knowles Training Institute February 2025 – April 2025

Assisted in modernizing the SSGC website, enhancing its functionality and user interface. Contributed to web development and Java-based projects under senior supervision.

- Revamped SSGC website with WordPress and Elementor, boosting page load speed by 45%.
- Enhanced UI with CSS and JavaScript, increasing user engagement.
- Developed a Java-based game as a course requirement, implementing object-oriented design for interactive features.

PROJECTS

OBLAS Employee Management System | Vue.js, PHP, MySQL, Insomnia, Codeception

- Assisted in developing a full-stack system with Vue.js and PHP.
- Tested APIs with Insomnia and Codeception, ensuring 100% uptime during deployment.

POS and Inventory System | PHP and MySQL

- Built a POS and inventory solution with PHP and MySQL, streamlining business operations for small retailers.

Attendance Management System | Python, Tkinter, MySQL

- Designed a desktop app with Tkinter GUI, tracking attendance for 50+ employees.
